Mountain Vault Becomes First Vault Facility in Arizona to Receive *SecurePlus* Accreditation; Introduces New SDBIC Insurance Solution

Phoenix, AZ. – Mountain Vault, a leader in high end private vault storage announced today that it is the first vault company in Arizona to receive the *SecurePlus* accreditation. *SecurePlus*, designed by SDBIC, LLC and underwritten by AXA, permits vault facilities, who satisfy a rigorous assessment of its physical plant and operations, to offer individual insurance policies tailored to meet the exact needs of its customers.

As a result of the accreditation, Mountain Vault now provides insured storage through SDBIC covering all legal property contained in a safe deposit box or private vault unit against all natural disasters, as well as theft due to burglary or robbery and other catastrophes. No upfront disclosures or appraisals are required to obtain or increase coverage, nor are deductibles paid upon any loss.

Coverage uniquely extends to also protect property with no intrinsic market value, including important papers and documents such as wills, titles, deeds, trusts, passports, digital backups and photos.

“We are continuously working to ensure that our facility offers customers the most sophisticated and innovative security coupled with unparalleled privacy and confidentiality,” said Joe Pruess, owner and President of Mountain Vault. “The *SecurePlus* accreditation together with SDBIC’s unique, comprehensive insurance provides our customers the highest assurance that they are protected against loss of their valuable property in every possible way.”

With *SecurePlus*, vault customers can select the precise amount of insurance coverage desired for their contents and have a policy issued directly in their name, which they can actively manage to address any changes in the property being stored. The insurance is underwritten by AXA Art, a specialist in insuring high value property in storage. AXA Art is a member of AXA Insurance, one of the largest insurance groups in the world.

“*SecurePlus* represents a critical enhancement to vault companies’ core service,” said Jerry Pluard, President of SDBIC. “For those customers seeking a world class facility and a tailored, personalized insurance solution, accredited facilities like Mountain Vault represent the best option for storing their valuable collections and investment assets such as precious metals” added Pluard.

Mountain Vault customers can quickly and easily access coverage limits— up to \$500,000 or more —through a new, secure web portal www.insuremybox.com/mountainvault, by calling SDBIC directly at 844-426-9467, or in-person at the vault facility.

###

*SDBIC was founded around one simple concept—help consumers protect their most valued possessions. Our unique, patented insurance solution protects possessions stored inside safe deposit boxes, without compromising on confidentiality or privacy. SDBIC is one of the fastest growing insurance products for high value investable and collectables in the market today. *SecurePlus* accreditation was developed by SDBIC, in response to the lack of a recognized standard to assess the safety of property being stored at private vault facilities. To learn more about how to become an accredited facility or to sign up for coverage please visit www.insuremybox.com or call 224-227-6181.*
